

Sprint Planning/Progress Update

- We have completed the tasks for Sprint 3 (Project = 50%) which are.

- Upload Website to Webhost (Test Run/Testing)
- JavaScript/AJAX Functions
- UI/UX Enhancement
- Database Revamping/Finish (Depending on what gets added)
- Website Functionality (Diary, and all the functions)
- Bug Triage and Fixing

These are the tasks that I have given to my teammates. Some are carried over to Sprint 4 as they are still not done.

- The tasks and assignments for the next Sprint are.

- Unit Testing (PHP, JavaScript, Database)
- Cross-Browser and Responsive Testing
- Database per Account
- User Acceptance Testing
- Bug Triage and Fixing

These are the tasks and assignments for our next Sprint.

Sprint Retrospective

What went well – Most of the tasks went well, we have done everything listed in our Sprint 3, We have achieved most of our mockups, our diary works and has a Database, we uploaded our Website in our webhost so we can Bug Triage and do all the tasks.

What could be improved – Our speed, although I know that me and my teammates haven't done something like this, we need to do everything in a fast manner as there are only limited time left. Our team could use a lot more communication as it hinders our efficiency.

What needs to be done - More Functionality and User Usability, Security in our code, more Bug Triage and fixing, website is usable but its only for one person because the Database is not finished Yet and also our other pages needs to be finished.
