

Sprint Planning/Progress Update

- We have completed the tasks for Sprint 4 (Project = 55%) which are.

- Different DB for accounts
- Add images for diary entry
- User Functionality
- Mobile responsiveness to different pages
- Add icons to mood tracker
- Add forget password function and design

These are the tasks that are carried over to Sprint 5 as they are still not done.

- Add image feature
- Enhance design in some areas

These are the tasks and assignments for our next Sprint.

- Database Mood Integration
- Fix errors
- Display Charts in our website
- Overall design layout
- Functionality on all areas

Sprint Retrospective

What went well – Some of the tasks went well, we have done some tasks in our sprint especially one of our features in where the user can add image. It stores now the user's input even if they logged out.

What could be improved – Our communication to each other. Some of my teammates are having busy schedules that's why they can't do their task on time sometimes. Teammates need to code more instead of designs only.

What needs to be done - Full functionality, database integration for our charts, update Webhost(Hostinger). Website should be all redirecting and fully working.
