- Features functionality
- Database integration

These are the tasks and assignments for our next Sprint.

- Final layout
- Fix some feature error
- Database checking
- Functionality on all areas

Sprint Retrospective

What went well – It has been a hard week but we still made progress on our sprint 5 with what is listed.

What could be improved – Our team can do much better at task management. Some features are needed to be improved as they are not optimized.

What needs to be done – We need to finish everything listed in this Sprint 5 and other Sprint 6 for next week because some tasks are still not finished. That way we don't have to rush our Website when it comes to Sprint 7.
